

RINGCENTRAL APP: USING CALL PARK

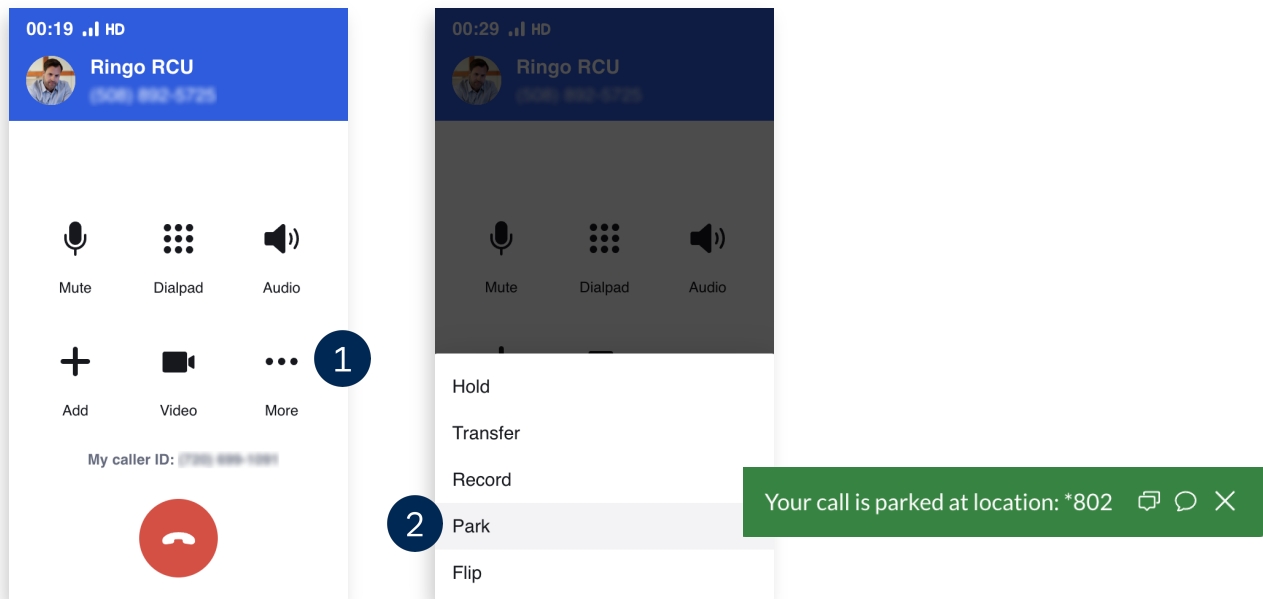

Call Park is a feature that allows RingCentral app users to send a call to a park extension, and have a different user pick up the call by dialing the system-generated extension.

PLACE A CALL IN A PUBLIC PARK LOCATION

During an active call, follow these steps to place the call in a public park location.

1. Click **More**.
2. Click **Park**. The system displays the park location in green, with options to share the details through a chat or text message.

Note: Call park location extensions are automatically generated, with ranges from *801 to *899.

RETRIEVE A CALL FROM A PUBLIC PARK LOCATION

Follow these steps to retrieve a call from a public park location:

1. Enter the appropriate park location extension of the call you want to retrieve using the dialpad.
2. Click the **Dial** button.
